

WOMEN BUILD CELO HACKATHON REPORT

2023

Web3Ladies Hackathon with Celo Blockchain

HACKATHON EVENT REPORT

Overview

CeloFoundation partners with Web3ladies, a leading web3 community focused on raising the next generation of female disruptors in the web3 ecosystem to organise the first-ever female-only hackathon for women in Africa which took place from the 16th -19th of May 2023.

Women Build Celo Hackathon 2023 was a fully virtual 98hr event that encouraged female innovators from different sectors to explore different ideas in collaborative teams. The Women Build Celo Hackathon focused on solutions for the utilization of Celo blockchain in healthcare, the electoral process, GameFi, Defi, Refi etc to solve economic problems

The Hackathon event attracted 31 teams of over 300 participants who tackled problem statements and provided solutions. Among the 31 teams were a team of 10 married women who developed a game project and a team of students from Kenya.

While there is still much work to be done in creating truly efficient and impactful blockchain projects in the Celo ecosystem in Africa, we continue to be excited by the potential for blockchain adoption and the important role that it can play in facilitating Open Government discussions, collaboration and innovation in enabling the African economy in post-COVID-19.

Pre Hackathon Summary

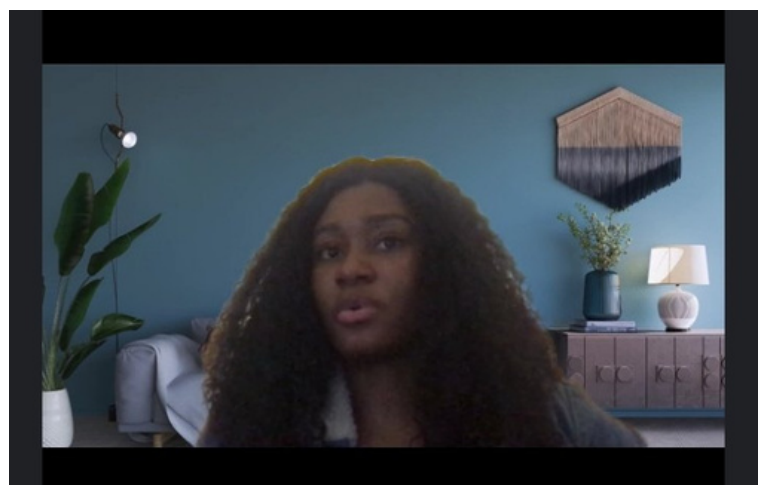

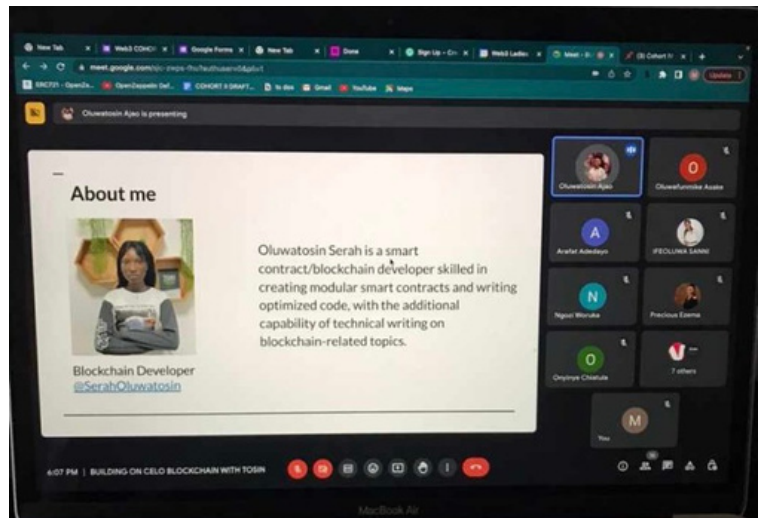

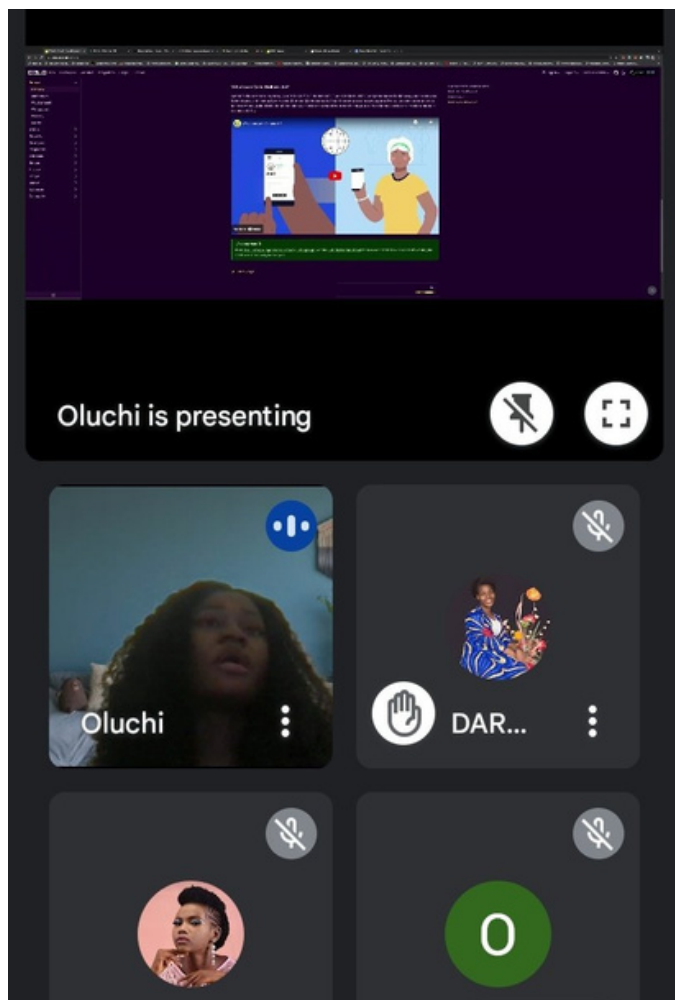

In preparation for the hackathon, we kicked off a series of workshop sessions and project ideation stages for the participants which lasted from the 25th of April to May 12th. This allowed participants ample time to learn about the Celo blockchain while getting into teams and brainstorming ideas

Participants were taught how to deploy a smart contract project on the Celo blockchain, how to build react frontend projects on Celo and understand the working mechanisms of the Celo blockchain.

The recordings for some of the sessions are included here:

- **Building on Celo Blockchain**
- **Building a Front-End React Project on Celo**
- **Deploying a Smart Contract on Celo Blockchain**

Here are some screenshots from the sessions:

Hackathon Event Summary

The Women Build Celo Hackathon was held on 16-19 May using the Google Meet platform facilitated by WBC Organizers and streamed online via Web3ladies Youtube accounts.

The 96-hr event was structured as follows:

Tuesday, May 16, 2023 :

- Hackathon Kick-off- Schedules were handed over to participants and a timeslot for final project review and ideation was handed to each team.

Wednesday, May 17, 2023:

- Hacking and debugging of codes
- A project review session with assigned mentors

Thursday, May 18th, 2023

- Smart contract review with Oluchi
- Hacking continues

Friday, May 19th, 2023

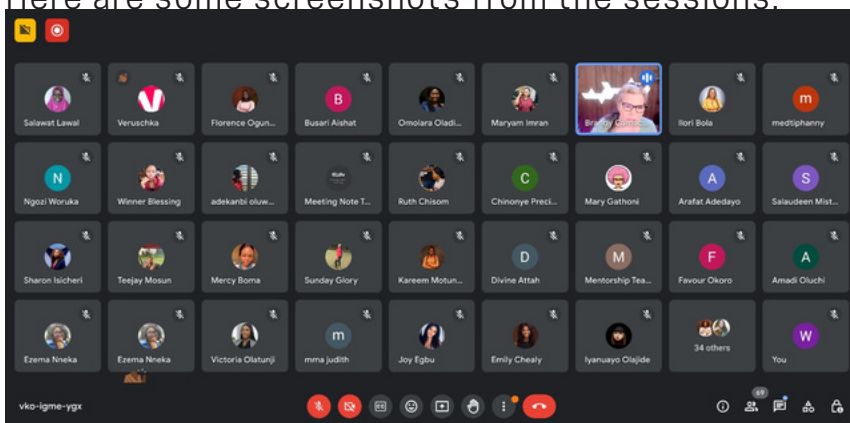

- Submission of projects
- Virtual demo day with judges

The virtual demo lasted over 3 hours, with 18 teams presenting their projects to 3 judges and the remaining teams had to submit a recorded video demo due to time constraints.

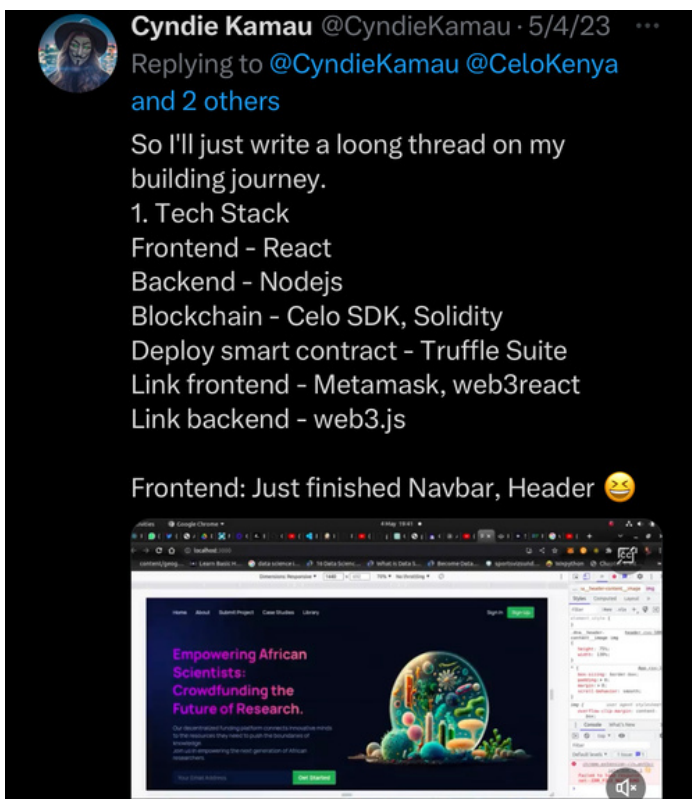

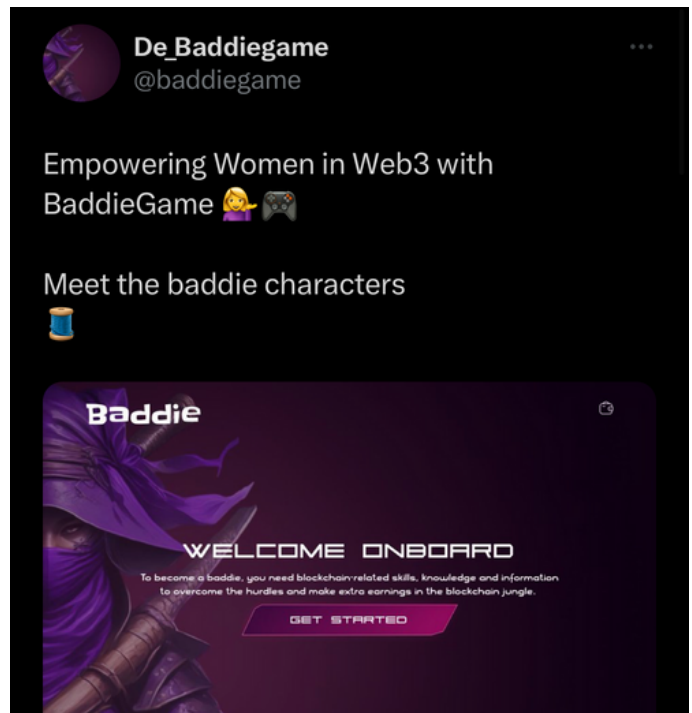

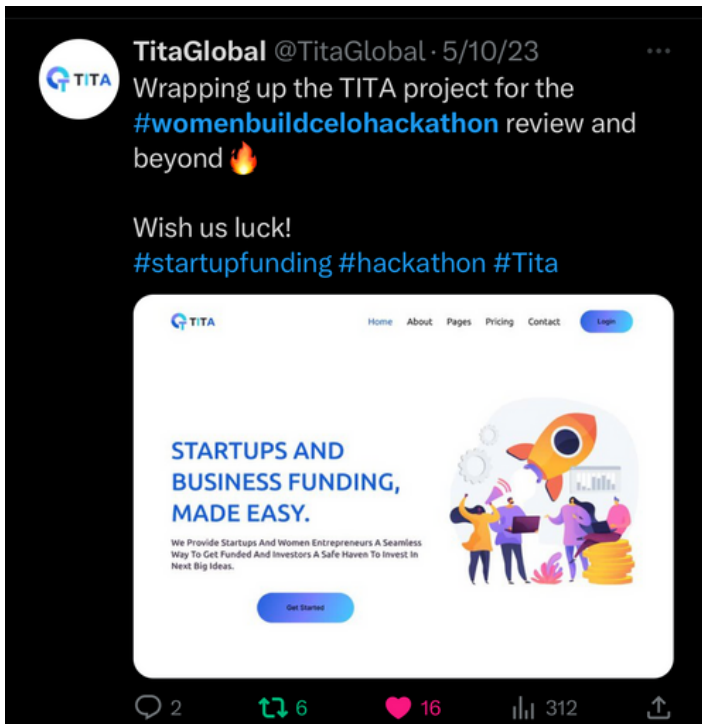

The recording of the live demo, as well as the project submission with the grades can be found here:

- **Women Build Celo Virtual Demo Day**
- **Women Build Celo Project Submission Sheet**
- **Grades and Feedback on Project By Judges**

Here are some screenshots from the sessions:

Some of the teams took to their social media pages to speak about the demo day and also document their building process.

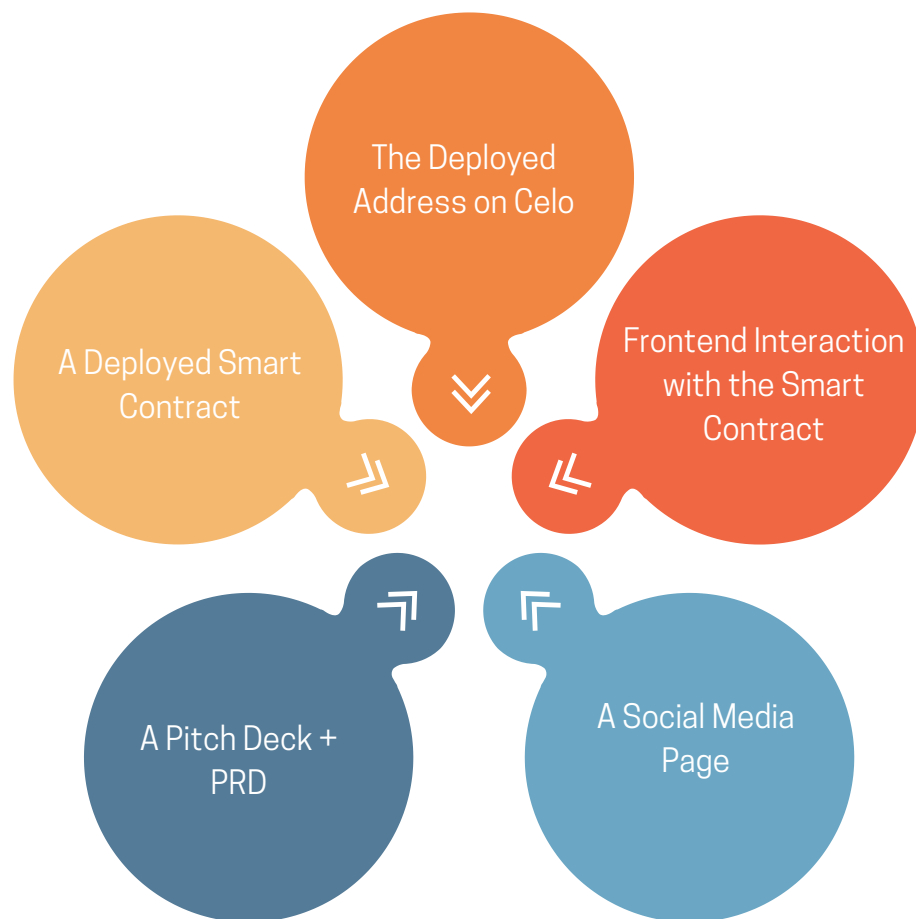

Judging Criteria

We received quite a number of amazing submissions and were judged by the following criteria after giving a short pitch in 3 mins and a demo of their project.

Each criterion carries its own point and we emphasized heavily on participants adhering strictly to the given rules.

The Criteria

Point Allocation System

S/N	Feature Implementation	Points
	Github/ Smart contract+Backend Implementation	50
	Security	10
	Mobile Optimization	10
	Logic	30
	Test Coverage	5
	ReadMe Document	5
	Contract Deployment	5
	Frontend Implementation and Integration	20
	Presentation + PRD	10
	Socials	5

Hackathon Champions

With great excitement, we present you the winners of the Women Build Celo Hackathon 2023.

Projects and Prototypes

The project submissions are described below:

Team Twilight(1st Position)

Project Description: {CryptoCrowd}: A Decentralized crowdfunding platform built on the Celo network for tech startups to get funding for their projects through peer-to-peer network supporters.

Features

Users would be able to contribute to projects using Celo's native cryptocurrency, CELO, or other supported cryptocurrencies. The aim is to help tech startups raise funds in a more inclusive and efficient way while providing greater transparency & security through the use of smart contracts.

Team Members- Purity Ogheneochuko, Nneka Ezema, Nofisat Ayanlola, Progress Eyaadah, Olayinka Babalola, Glory Sunda, Salaudeen Mistura, Oluchi Amadi, Esther Amarachi, Blessing Winner

Project Image

Team Havid(2nd Position)

Project Description: PayStream is a video streaming platform.

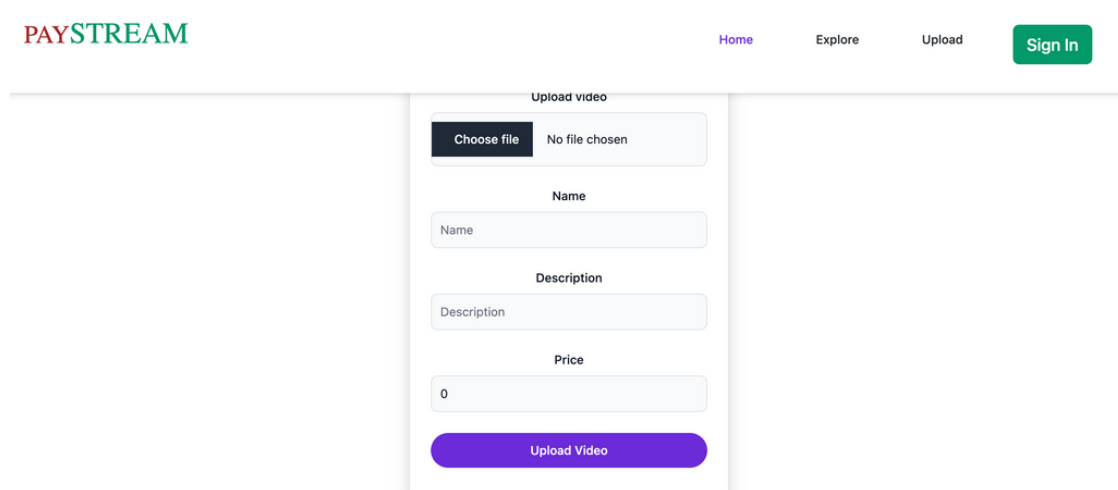

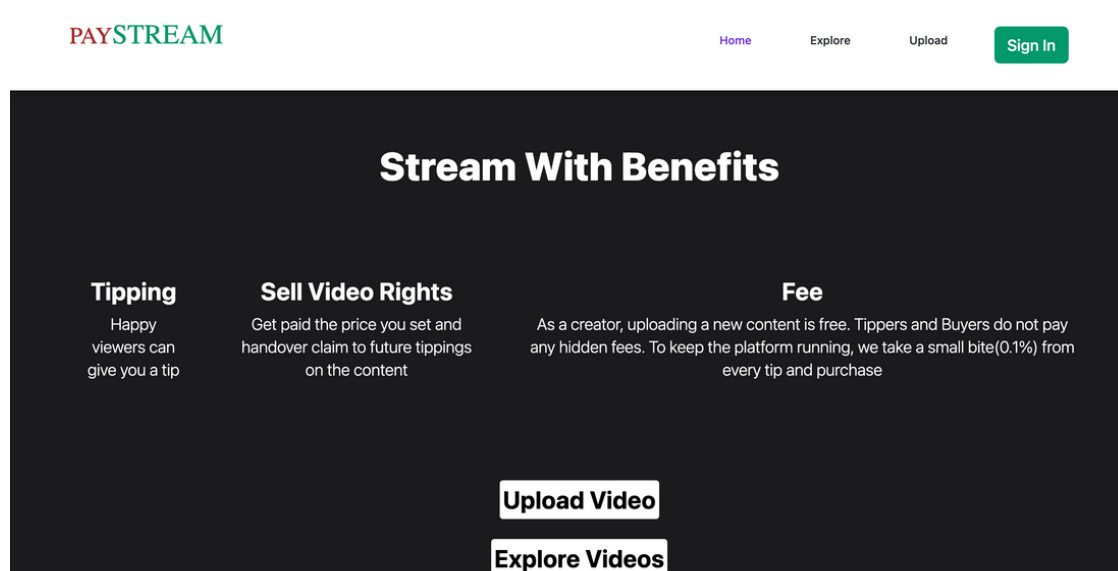

Get paid when you upload videos that viewers love.

Features

- 1) Happy viewers can give you a tip
- 2) Sell Video Rights: Get paid the price you set and handover the claim to future tippings on the content
- 3) Pay or tip with different currencies

Team Member- Happiness David(Solo Hacker)

Project Images

Team Estate Elite (3rd Position)

Project Description: The project aims to create a decentralized platform that connects property sellers in Africa directly to property buyers.

Feature

The platform will leverage blockchain technology and the celotoken as a means of exchange, thus eliminating the need for intermediaries such as agents and their fees.

Team Members- Youth Johnson, Clementina Odeghe, Eneh Mercy, Maltida Anashie, Wanjiku Njoroge, Angelica Bassey, Juilet Iroka, Nardos Tilahun, Emene Emilia

Project Images

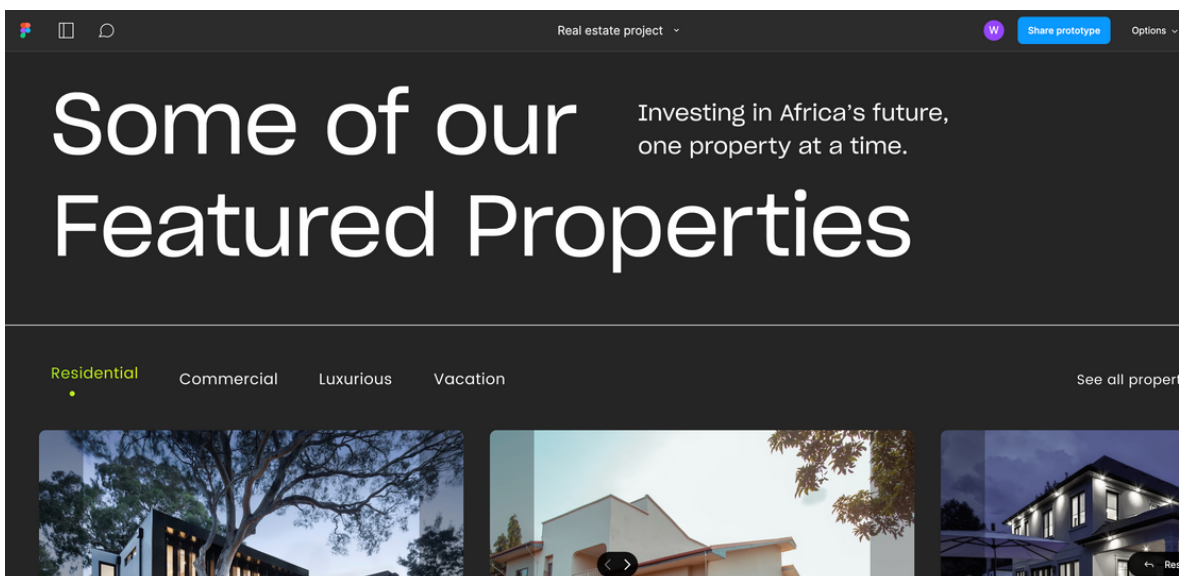

Decentralized real estate for Africa.

Buy & Sell Real Estate with Web 3

Special Project Recognition Awards

These are projects which didn't make it as runner-ups but deserve special recognition and awards for the efforts the team has put into fine-tuning the ideas and bringing them to life.

Most Impactful and Useful Project: Team Cyndie

Project description: Qwame is a decentralized crowdfunding platform for African scientists, connecting researchers with funding and grants for their projects. By fostering community engagement, collaborations, and resource access, Qwame empowers African researchers to advance their work.

Team Member: Cyndie Kamau (SoloHacker)

Most Original, Creative and Innovative Project: Team CeloBaddies

Project description: CeloBaddie is an ed-tech platform that combines the engaging power of gaming, education and Decentralised finance (DEFI), as a means to increase knowledge of the exponential potential of blockchain technology.

Team Members: Favour Onyebuchi, Patience Igwe, Oluwasesan titilayo Dorcas, Busari Aishat Omolabake, Chinwe Nancy Ubah, Owolabi falilat Wuraola, Rhoda Onuoha Gift

Most Technological Driven Project: Team Tech Titan

Project description: TITA - TRANSPARENT, INCLUSIVE, TOKENIZED, ASSET. TITA is the first decentralized microlending platform built on the Celo blockchain. It connects investors, startups, and entrepreneurs in an ecosystem that makes lending and borrowing easier. TITA provides a platform for startups and entrepreneurs to access funding from a pool of investors who are interested in supporting innovative ideas and entrepreneurial ventures. It leverages blockchain technology to ensure secure and transparent transactions.

Team Members: Kareem Motunrayo, Oyeboade Tijesunimi, Adeyinka Adeyelu, Oluwafunmike Akinsanmi, Chukwuma Chisom, Iwuchukwu Deborah, Ejimofor Hannah

Post Hackathon Engagement

The Women Build Celo Hackathon demonstrated the potential and tangible benefits that can be derived from team collaborations. The activity prompted the participants to think creatively about possible innovations to enhance the African blockchain ecosystem. This illustrates the power of technology to provide a catalyst and a platform for creative coproduction and collaboration between women in the industry.

In line with our mission at Web3ladies to raise audacious women in the blockchain space we will require further collaboration with the CeloFoundation team to organise a post-hackathon series similar to the Celo Stackshift Program but with a twist that allows more women from over 10 African countries to contribute to task while earning a bounty reward. Haven raised a pipeline of female developers, as a team we would want the majority of them to be involved in an internship opportunity with Celo blockchain, this will enable the participants to keep making contributions to the ecosystem even after the hackathon experience.

Conclusion & Acknowledgement

We appreciate the entire WBC organizing team, and also the Web3ladies team who have worked tirelessly to give the participants a lasting experience.

Special thanks to the CeloFoundation team, Anna, Brandy and Ernest who keyed in our vision and supported us all through the journey

Special recognition to all our community partners, **Women In DeFi, EmpowerHerCommunity and HerDAOKenya, with your help we were able to reach as many women as possible.**

THANK YOU!
